 @shirron\_inc

In 1982, Shirron, Inc. began as a small family business. We provided quality parts and products for domestic manufacturers. Shirron ensured the highest quality standards by enlisting a team of manufacturing experts in Taiwan who had an extensive background in mechanical engineering and quality control procedures.

In 2007, after 25 years of building parts for the US Military and companies like Wal-Mart, we changed our focus to the beer dispensing market. It started out small with some of our products aimed at the homebrewing market. Several years later, however, we were building products for some of the most well known companies in the beer dispensing industry.

Today, we continue to work with the innovators in the beer dispensing field. As the beer market continues to grow, the creative-minded people who build parts for the industry continue to come up with more creative ideas to get beer into the glass.

Our goal is to continue to support current and future businesses by building and providing high quality products that meet or exceed expectations while providing excellent customer service.
